

YOUSEF FATOURAEE

Software Engineer

EDUCATION

2024 - 2025
Master of Software Engineering
University of Calgary

2014 - 2019
Bachelor of Computer Engineering
AUT

CERTIFICATIONS

2023 - 2023
Professional Certificate in Front-End Development
Meta

SKILLS

- **TypeScript**
- **PHP**
- **HTML**
- **CSS & Sass**
- **SQL**
- **UI/UX & Figma & Adobe**
- **Linux**
- **Test**
- **REST API**
- **GraphQL**
- **MongoDB**

SUMMARY

Full-stack Developer focused on building high-performance web applications from ideation to production. Skilled in JavaScript, PHP, and Python, delivering end-to-end solutions independently or as a key team contributor.

WORK EXPERIENCE

Full Stack Developer — **Sep 2025 - Present**
Aware Ads Inc. | Toronto, ON

- Integrated international shipping to help scale business across 30+ countries in Europe, North America, and East Asia, driving 10% increase in sales.
- Integrated and implemented 3 secure payment gateways (Google/Apple Pay, Web3) and 2 CRM systems (Konnektive, RevCent) to reduce payment processing costs and improve system reliability, while resulting in 5% increase in conversion rates.
- Consolidated 3+ e-commerce backends into a unified PHP microservice architecture on AWS cloud, to improve system scalability and reduce infrastructure costs.
- Designed and implemented a modular React/TypeScript/Tailwind architecture to refactor 20+ legacy landers, minimize bugs, increase maintainability, and enable rapid campaign deployment while hosting 5,000+ daily visitors.

Software Engineering Graduate Student Intern — **Jan 2025 - Apr 2025**
Urban Systems Ltd. | Calgary, AB

Led a team of 4 engineers to build municipal asset management software using Python Django, to replace Excel workflows and streamline inventory operations.

- Designed a flexible relational database to improve data consistency and robustness against malformed values, reducing validation issues by up to 60% across 10,000+ records, and integrated it with 10+ interactive tables and D3.js charts for user insights.
- Developed a cost calculation algorithm to automatically estimate maintenance expenses, improving budget planning accuracy by 15% and eliminating human errors.

Full Stack Web App Developer — **Apr 2023 - Mar 2024**
Public Health Agency of Canada & AAISA | Calgary, AB

Led end-to-end development of a multilingual Laravel + React Progressive Web Application (PWA), enabling 15+ agencies across Alberta to automate mental health service assessments.

- Conducted stakeholder sessions with 3+ governmental organizations to translate business requirements into an optimized software architecture, normalized relational schema including 10+ entities, 3 role-based access levels, and 20+ responsive pages.
- Implemented 2 survey systems with full admin control over domains, questions, input formats, schedules, and participations, featuring automated email notification.
- Designed a resource recommendation algorithm to improve organizational service delivery, using 211.ca REST API and a caching layer for 60%+ faster lookups.
- Designed and developed responsive React.js pages featuring 10+ advanced filtering options, interactive charts and tables, and exportable reports tailored for organizations and administrators.
- Authored PHPUnit test cases for 5+ new features, achieving over 90% code coverage to ensure application reliability and performance.

SIDE PROJECTS

Full Stack Developer — 2023 - Present
https://publicipaddress.info

Designed and implemented a comprehensive network intelligence platform featuring a search engine with 100ms average response time across 9,000,000+ documents using React.js, Bootstrap, PHP, Python, Django REST Framework, NGINX, Docker, SQL, Elasticsearch, GitHub Actions (CI/CD), and AI.

Front End Developer — 2023 - 2024
Software Developers of Calgary

Developed an event management platform (https://sdc.fyi) adopted by 2 different cities across Canada to streamline organizing project-based hackathons, utilizing React, TypeScript, Node.js, and Prisma.
